

**IT 378 – Database Processing**  
**Assignment #3 – ERD Conversion**

**Convert the E-R diagrams to relational schema and show:**

- **Primary Keys (using underline)**
- **Foreign Keys (using dotted underline)**
- **Referential Integrity**

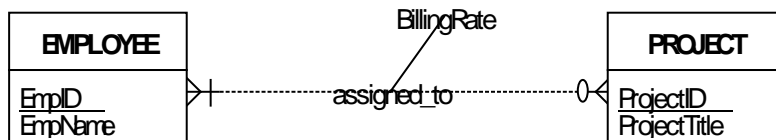

**Your schema should look similar to the example below:**

CUSTOMER						
<u>CustNo</u>	CustName	...	...	...	...	...

  

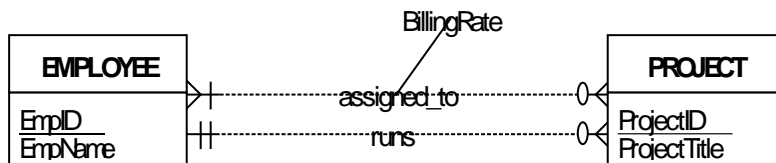

ORDER						
<u>OrderNo</u>	OrderDate	...	...	...	...	<u>CustNo</u>

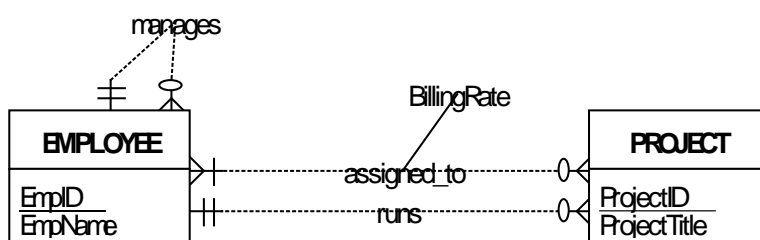

1.

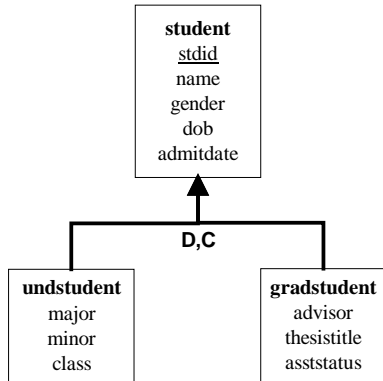

2.

3.

4.

5.
